

Hereditary Cancer Checklist

Please complete this checklist. *Note: this is a screening checklist to help determine if there could be an inherited (passed-down) cancer risk in the family. This checklist is not medical advice. If you have questions or concerns, please speak to your doctor.*

Circle YES if you or any of your family members have had the following:

- Yes / No** Known genetic cancer risk in the family (sometimes called a gene mutation)
- Yes / No** Cancer diagnosed younger than age 50
- Yes / No** 3 or more relatives with the same type of cancer
- Yes / No** Ovarian cancer
- Yes / No** Triple negative breast cancer
- Yes / No** Pancreatic cancer
- Yes / No** Prostate cancer that has spread (metastasized)
- Yes / No** Male with breast cancer
- Yes / No** 3 or more relatives on the same side of the family with breast, prostate, and/or ovarian cancer
- Yes / No** 3 or more relatives on the same side of the family with colon and/or uterine cancer
- Yes / No** Female with breast cancer under the age of 45
- Yes / No** Colon cancer under the age of 50
- Yes / No** Uterine cancer under the age 50
- Yes / No** 10 or more colon polyps (in a lifetime)
- Yes / No** Kidney cancer under the age 46
- Yes / No** Stomach cancer under the age of 40
- Yes / No** Hyperparathyroidism (high parathyroid hormone levels) or parathyroid adenoma (specific type of non-cancerous tumor) before age 30
- Yes / No** Adrenal cortical carcinoma (cancer of the adrenal gland)
- Yes / No** Neuroendocrine type of pancreatic tumor
- Yes / No** Paraganglioma or pheochromocytoma (type of neuroendocrine tumor)
- Yes / No** Medullary thyroid cancer at any age
- Yes / No** Ashkenazi Jewish ancestry (heritage)
- Yes / No** 3 or more diagnoses of invasive melanoma (in a lifetime)

If you circled YES to any of the questions, genetic counseling and testing may be helpful for you. Please talk to your doctor or contact us for more information about your answers and to discuss options.

Hereditary cancer clinics serve those with a personal and/or family history of breast, ovarian, colon, pancreas, prostate, and/or other cancers suspicious of a hereditary cancer syndrome.
