

Module 1: Oral Health Care for Residents in Long Term Care Facilities

Course Objectives:

1. Increase direct care providers' awareness of the importance of providing/supervising daily oral care for the long term care resident.
2. Implement effective oral care measures for the long term care residents and their direct care providers.
3. Direct care providers will be able to recognize and report oral pain and abnormal conditions in residents' mouths to charge nurse or dentist.
4. Direct care providers will utilize correct behavior management and communication strategies when providing oral health care for long term care residents.
