AND SAFETY

PARTICULARLY HAZARDOUS SUBSTANCES (PHS)

This list contains examples of chemicals that may be used at the University of Nebraska Medical Center (UNMC). *The list is not all-inclusive.*

This lists contains examples of Particularly Hazardous Substances (PHS) which are a special subset of OSHA Hazardous Chemicals. PHS include chemicals that are known or suspect carcinogens, reproductive toxins, and/or highly toxic materials. Before working with any PHS, please determine if you have any of these and evaluate if additional protective work practices are needed. You should utilize the [PHS Assessment Form](#) to help in this evaluation.

Abbreviations Used in List Headings

CARC NTP	National Toxicology Program listed carcinogen - <u>National Toxicology Program</u> K = known carcinogen S = suspect carcinogen
CARC IARC	International Association for Research on Cancer listed carcinogen - <u>IARC</u> 1= known human carcinogen 2A = probable human carcinogen 2B = possible human carcinogen
