

SAFETY GUIDELINE

Construction & Remodeling Safety

Purpose

This safety guideline outlines the actions UNMC employees and students must follow to ensure their safety in and around construction and remodeling sites on campus.

UNMC Employee Responsibilities

- UNMC employees must not enter construction zones.
- If UNMC employees need to enter construction zones, employees must contact the UNMC Project Manager or contractor.
- If allowed to enter a construction zone:
 - Employees should be aware of potential hazards, including:
 - Moving machinery
 - Trip hazards due to construction material, debris, or tools
 - Electrical Hazards
 - Employees must wear proper PPE while in construction zones, including:
 - Hard Hats
 - Safety Vest
 - Gloves
 - Safety glasses or goggles
 - Closed to shoes (e.g. no sandals)
- Immediately notify the UNMC Project Manager and EHS if any hazardous conditions are observed.
- UNMC employees must not touch or tamper with equipment, tools, or building materials in the construction zone.

Safety Signage and Warnings:

- UNMC employees must follow all signage and procedures in and outside the construction zone.
- UNMC employees are prohibited from entering areas marked as restricted.
