

Researcher Identity Management

November 26, 2024 | 11 am | MCPH 3013 & Zoom

Jess King, MLIS
Assistant Professor
Education and Research Services
Librarian

Join us for an essential presentation on Researcher Identity Management, designed to help you build and maintain a professional research profile that maximizes your visibility and impact. This session will cover the critical platforms for managing your scholarly identity, including ORCID, Google Scholar, and Scopus. You'll learn how to set up accounts, track your publications, and maintain an accurate record of your research output across these platforms.

In addition, we'll dive into understanding the H-index, a key metric used to measure the influence and impact of your research. With this metric becoming more well-known, it is crucial for faculty and PhD students to grasp how to track their scholarly output and increase their visibility in the academic community. This presentation will provide practical tips and insights to ensure your research profile is not only up-to-date but also positioned to support your career advancement. Whether you are a seasoned researcher or preparing to graduate, this session will give you the tools needed to effectively manage your academic identity.
