

<b>TITLE:</b>	<b>IBC39- Select Agent Program - Pest Management Plan</b>
<b>OVERVIEW:</b>	Federal guidelines require that an integrated pest management plan be available for those laboratories that are classified as Animal Biosafety Level-3 (ABSL-3) and Biosafety Level-3 (BSL-3).
<b>APPLIES TO:</b>	Laboratories certified by the Select Agent Program to store and do select agent research.
<b>DEFINITION(S):</b>	Not applicable
<b>PROCEDURES:</b>	<p>An integrated Quality Assured Pest Management and Sanitation Program for UNMC is provided as a contractual service through Presto-X-Company in Omaha. This plan is a part of the Environmental Services program on campus.</p> <p>Outlined in this program are specific procedures to manage pests within the high containment laboratories on campus. See <b>IBC39-Form 1</b> for specific details as contained in this program document.</p>
<b>RECORD KEEPING:</b>	Each annual laboratory inspection will include a discussion on pest management with the PI as it pertains to the research laboratories. This topic will be included on the checklist for these inspections.
<b>OTHER INFORMATION:</b>	<p>A risk assessment will be conducted by the Manager, Director, Biosafety Officer, and the Director of Environmental Services or designee to determine what materials will be needed for control of a pest problem when they occur.</p> <p>Pest management personnel will only be allowed into the select agent approved areas under escort of a DOJ-approved individual.</p>
